

DynaMed[®]

Improving Patient Outcomes by
Transforming Clinical Decision Support

What's New?

- Increased screen space for clinical content
- Reintroducing the "Announcements" section to highlight key new content types and topics
- Displaying a user's "recently visited" topics right from the search bar
- Providing additional clarity and calls to action around creating a personal user account as well as CMEs available and earned

Did you know...

- Calculators can now be found in search results
- Algorithms have increased user friendliness including zoom and pan capability and are available to be downloaded as PDFs for easy printing
- You can follow entire specialties to stay current on any updates
- Updates can be filtered by Practice Changing only and evidence labels have been added to alerts
- You can cite content with the citation tool in the top right of a topic
