

AC RESEARCH SUPPORT NEWSLETTER

THE ACADEMIC COMMONS

Spring 2021
East Falls Campus

Dear Colleagues:

As the new director of the Paul J. Gutman Library here at the East Falls campus, I am happy to present to you the Spring Research Support Newsletter. In this semester's issue, you will find timely and informative content focusing on new resources (LabArchives Inventory Management), Grant & Funding (Open Access Fund and Pivot Profile updates), and useful Citation and Statistic Tools. We hope that this newsletter serves as a useful guide to the research services and tools we provide here at the Gutman Library. We look forward to using this newsletter to keep you all informed on the new and innovative ways we can assist you with your research.

Thank you for the opportunity to support you and have a great spring semester.

DaVonne Rooney
Director of Library Operations, Paul J. Gutman Library

New Resources

If you conduct qualitative research, the new [NVivo Community](#) is for you. NVivo is not new to qualitative researchers, but this new support tool offers an opportunity to collaborate with other researchers. By [joining](#) the **NVivo Community**, you'll be able to connect with other researchers through NVivo Research Networks, share your research, and find new funding.

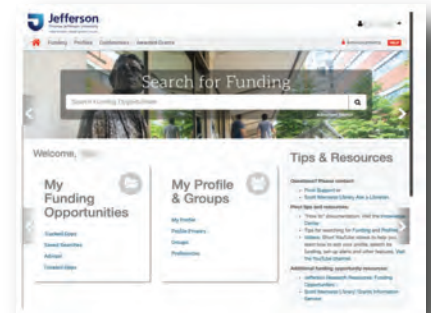

LabArchives Inventory is an easy-to-use tool that streamlines the organization, tracking, and ordering of lab inventory items. Team members can search by item name, type, and location. The system is highly customizable and links to your LabArchives Notebooks. Learn more about LabArchives Inventory on the [LabArchives webpage](#) or [sign up for a training](#) (offered every Tuesday at 1pm).

Grants & Funding

Let us cover your Article Processing Charges (APC) with the Jefferson Open Access Publishing Fund. The fund offers financial support to Jefferson faculty, students, and staff who wish to publish in Open Access journals. The fund will contribute up to \$2,500 per article. [Apply today.](#)

As of January 25, 24 authors have received funding from the Open Access Publishing Fund this academic year. Check out the [growing list of fund recipients](#).

Are you looking for funding or interested in connecting with others to collaborate with on grant submissions? Pivot-RP can help! Pivot-RP is the new name of the popular grant search engine Pivot-RP, and along with its new name comes a new interface. Once you create and customize your Pivot-RP profile, sign up to receive weekly emails for grants that match your research interests. Check out our [LibGuide](#) to find out more about Pivot-RP and read our [blog post](#) for details on how Pivot's updated interface will help you.

Update your [Pivot-RP Profile](#) to have new funding opportunities sent to you weekly.

Statistical Tools

SPSS 27 Premium: If you are not using SPSS 27, upgrade the statistical tool to take advantage of new premium features, including complex samples, exact tests, and neural networks. If you are using SPSS 27, these enhancements will be automatically available to you after you restart the program. For installation instructions, [visit the library website](#). Learn more about [what's new in version 27](#). Visit the [library website](#) to learn about the other statistical tools we support.

Citation Tools

We have multiple citation tools to help you keep track of your research. Find out which is perfect for you:

APA Citation Support: Do you need help with the new APA 7 citation guidelines? Read our [LibGuide](#) for the latest information.

Sciwheel: F1000, a popular citation manager, is now called Sciwheel. This reference manager helps organize your sources, share citations with colleagues, read and annotate full text, and insert citations into documents.

[Learn more](#) about our citation tools.

Publishing & Communication

Faculty and staff can consult the [Office for Professional Writing, Publishing, and Communication](#) for free editing support and assistance at any stage of their writing, publishing, or presentation development process. Either sign up for a one-on-one consultation or join the OPWPC at an upcoming workshop (details below).

The **Jefferson Digital Commons (JDC)** serves as Jefferson's open access institutional repository. It's a great resource to share your scholarly work and find that of other faculty, staff, and students. Visit jdc.jefferson.edu to check it out.

All Jeffersonians creating scholarly works are encouraged to create an **ORCID iD**. The Open Researcher and Contributor Identifier (ORCID) is a persistent digital identifier given to authors that allows researchers with similar names to be easily distinguished from one another by the scholarly and publishing community. An ORCID iD will follow an author throughout their career, creating a stable scholarly identity across name, location, and institutional affiliation changes.

In the near future, through the Office of Faculty Affairs, TJU will introduce the Interfolio platform for faculty annual performance reviews, A/P/T, and other uses. Having an ORCID iD with a curated list of works will enable a smooth transition of publications from CVs to Interfolio. Learn more about ORCID by [watching this video](#) and [reading this flyer](#). Jefferson Libraries [created a guide](#) to help users create their ORCID iD and import their scholarly activities, including publications, posters, and presentations.

Support

Librarians are happy to meet with you to discuss your research needs. Visit our website to [request a consultation](#) for assistance using library resources or to request a literature or funding search. All consultations are conducted virtually at this time.

The Textile & Costume Collection will be open by appointment only this spring. If you are not able to visit in person, learn more about the collection by visiting and subscribing to the new blog [Follow the Thread](#) and check out the recently updated [Tapestry](#) site. Email [Jade Papa](#) with inquiries about holdings.

Events

Until further notice, all events will be held online. Click the title for more information and to register.
