## WHAT IS EVERYTHING SEARCH?

SML's **Everything Search** lets you search across an expansive selection of journals, e-books, presentations, digital objects, and databases using a single search query.

**Includes:** Annual Reviews, BIOSIS Previews, BMJ Publishing, Elsevier, HathiTrust, Hindawi Publishing, John Wiley & Sons, Johns Hopkins University Press, JSTOR, Mary Ann Liebert, McGraw Hill, Medline, NASA, National Academy of Sciences, Nature Publishing Group, Oxford University Press, PubMed, Springer, Taylor and Francis Group, Thieme Publishing, US National Library of Medicine, Wolters Kluwer Health. Over 70 institutional repositories (including the Jefferson Digital Commons). And much, much more!

*This is a great place to start, but when is it better to search in a specific database?*

For systematic reviews and advanced searches, we recommend searching within a specific database to take advantage of its unique search features and filters.

**For help with all searches, contact Scott Memorial Librarians:**

<http://library.jefferson.edu/help/>

# WHAT'S INCLUDED IN EVERYTHING SEARCH ?

*All of the Internet*

## EVERYTHING

**By Default:** All resources owned, or subscribed to, by the Library + selected free open access resources

SML physical collection of print journals

**Check "Include Results from Other Libraries":** Search for millions of additional items from other libraries and digital repositories. These may be requested through SML's InterLibrary Loan service.

100% of articles and ebooks from major collections:
